There is an elevator can be seen. to carry visitors up and down in the monument, and it takes a space of one hour to ascend or descerd. I went upon the elevator and walked down. Inside the monument there are plates or clabs with inscriptions from every State in the Union, Also from large societies and lodges telling the date of the time when it was placed in the monument and other suitable words. My home, while in Washington, was at 407 G street, Northwest, directly across from the Pension Building, where the inaugural ball will be held on the 4th of March in honor

of President McKinley.
One of the most beautiful features of this city is the great number of parks. Every available space, even in the business section of the city, is taken up by a park, and is open to every class of izens for rest and shade. For summer outing we also have several very pretty summer resorts, which can be reached by means of electric cars, and are located from ten to twelve miles out of the city. Some of the prettiest are Cabin John, where the largest single stone span bridge is located; Glen Echo, were an undergound theatre is located, all lighted up at night time with all colors of electric lights, and Chevy Case Lake, with its beautifully lighted woods and artificial lake, music and dancing, and most every other pleasure that can be mentioned. Another pretty place is Marshall Hall, a park about fourteen miles down the Potomac rive, and the site of one of the most historical homes in the United States, that of John Marshall, Chief Justice of the United States for so many years.

I have worked while here in one of the largest stores, called the Boston House, which occupies a whole square each way, and has for sale everything that is for sale, with the exception of groceries. After leaving here I went to work for the American Federation of Labor, one of the largest organizations of the country.
